Profile

Python developer training in an agile environment. Inclined to bring effectiveness to Brainest's development team. Driven by passion and innovation, designed an e-flashcard app implementing the Leitner system. Highly skilled in Python coding and scripting, Django framework, and communication.

Skills

Python programming

Network programming, Database Connectivity and ORM,SQLAlchemy, Django, System programming

C programming

System programming

SQL

Linux

Basic administration

Attention to detail

Analytical

Interpersonal communication

Teamwork

Active listening

Test Driven Development

Python unittest and doctest modules

Education

08/2021 – 08/2025
Masvingo, Zimbabwe

Bachelor's Degree in Computer Science, Great Zimbabwe University

05/2022 – 06/2023
Nairobi, Kenya

Full-stack Software Engineering, <https://www.alxafrica.com/>

Projects

Memorization Tool

An e-flashcard app written in Python using the sqlite database to store flashcards. It implements the Leitner's system which suggests reviewing cards at increased intervals. Flashcards are stored in three different boxes, each marked with a time period that shows how frequently the cards should be reviewed.

Languages

Shona

English
